Tom 142 – Tom 147, 1962

Vol. 3, Nos. 1–6 January–November 1962 Pages 1–1816

ANNUAL INDEX OF AUTHORS

Adel'son-Vel'skiĭ, G. M. and Landis, E. M. *An algorithm for the organization of information* .. 1259

Adjan, S. I. *Identities in special semigroups* 401

Agaev, G. N. *A theorem of Wiener type for series of Walsh functions* 129

On the theory of weak solutions for boundary value problems 942

Agranovič, M. S. *On the index of elliptic operators* 194

Agranovič, M. S. and Dynin, A. S. *General boundary-value problems for elliptic systems in an n-dimensional domain* 1323

Aĭzenštadt, A. Ja. *Semisimplicity of the semigroup of endomorphisms of ordered sets* 1

Akivis, M. A. *A class of tangentially degenerate surfaces* 1328

Akuliničev, N. M. *A dynamical system connected with the distribution of the fractional parts of a second degree polynomial* 405

Alekseev, V. G. *Conditions for the orthogonality and equivalence of Gaussian measures in functional space* 1680

Aleksidze, M. A. *Differential properties of the solution of the Dirichlet problem for regions with angles* 947

Numerical solution of the Dirichlet problem for Poisson equations 1787

Alenicyn, Ju. E. *Certain extremal properties of functions which are multivalent in a multiply connected region* 1263

Andreev, A. F. *A uniqueness theorem for a normal region of Frommer's second type* 132

Strengthening of the uniqueness theorem for an O-curve in N_2 1215

Andrianov, A. N. *Analytic arithmetic of quadratic forms with an odd number of variables, as connected with the theory of modular forms* 949

Andrunakievič, V. A. *Radicals and the decomposition of a ring* 901

Andrunakievič, V. A. and Rjabuhin, Ju. M. *Special modules and special radicals* 1790

Anisčenko, R. I. *On a boundary value problem for the Thomas-Fermi and Thomas-Fermi-Dirac equations* 1004

Anosov, D. V. *Roughness of geodesic flows on compact Riemannian manifolds of negative curvature* 1068

Arato, M. *Estimation of the parameters of a stationary Gaussian Markov process* 905

Arato, M.; Kolmogorov, A. N. and Sinaĭ, Ja. G. *Evaluation of the parameters of a complex stationary Gauss-Markov process* 1368

Arhangel'skiĭ, A. *The ranks of systems of sets and the dimensions of spaces* 456

On mappings of metric spaces 953

Open and almost open mappings of topological spaces 1738

Arnol'd, V. I. *On the behavior of an adiabatic invariant under slow periodic variation of the Hamiltonian* 136

The classical theory of perturbations and the problem of stability of planetary systems .. 1008

Arnol'd, V. I. and Sinaĭ, Ja. G. *Small perturbations of the automorphisms of the torus* 783

Aršon, I. S. and Evgrafov, M. A. *On the growth of functions which are harmonic within a cylinder and bounded, together with their normal derivative, on its surface* 140

An example of a function which is harmonic everywhere in space and bounded outside of a circular cylinder 307

Growth of harmonic functions of three variables 1684

Azarin, V. S. *Subharmonic functions of completely regular growth in multi-dimensional space* 1364

Badaljan, G. V. *Generalized regularly monotonic functions and a test for the absolute convergence of a quasi-power series* 3

Bahvalov, S. V. *Nomographing of solutions of a second-order differential equation* 1070

Bavrin, I. I. *Certain classes of analytic functions of two complex variables* 504

Uniqueness of extremum functions in the evaluations of Taylor's coefficients of bounded functions of two complex variables 1167

Belaga, È. G. *On the reducibility of a system of ordinary differential equations in the neighborhood of a conditionally periodic motion* 360

Belinskiĭ, P. P. *Continuity of spatial quasiconformal mappings and Liouville's theorem* 1742

Berljand, O. S.; Nazarov, I. M. and Pressman, A. Ja. *i^n erfc- or a composite Gauss-Poisson distribution* 1744

Berman, D. L. *Linear polynomial operations* 460

Polynomial operations commuting with translation 733

Classification of polynomial operations 821

Berman, S. D. and Gudivok, P. M. *Integral representations of finite groups* 1172

Bernšteĭn, I. N. *A set swept out by a straight line segment* 1217

Besov, O. V. *An example in the theory of imbedding theorems* 507

Bessmertnyh, G. A. and Levin, A. Ju. *Some inequalities satisfied by differentiable functions of one variable* 737

Bessonov, Ju. L. *Approximation of periodic functions of the $W_{p,\theta}^{(r_1,r_2)}$ classes by Fourier sums* 1635

Bicadze, A. V. *Mixed type equations in three-dimensional regions* 510

Birman, M. Š. *Conditions for the existence of wave operators* 408

A test for the existence of wave operators 1747

Birman, M. Š. and Kreĭn, M. G. *On the theory of wave operators and scattering operators* 740

Boas, R. P. and Rahman, Q. I. *Some inequalities for polynomials and entire functions* 1523

Bočarova, I. V. *On the asymptotic solution of a problem with a free boundary for the heat conduction equation* 365

Bokšteĭn, M. *Splitting in Künneth's formula* 1267

Bokut', L. A. *Imbedding of algebras into algebraically closed algebras* 1110

Bondi, I. L. *Functions A-integrable almost everywhere* 1013

Borovkov, A. A. *Asymptotic representations of generating functions and limit theorems in boundary value problems* 411

A probabilistic formulation of two economic problems 1403

Bredihin, B. M. *Binary additive problems with primes* 144

Bredihina, E. A. *Simultaneous approximation of almost periodic functions and their derivatives* 909

Briš, N. I. and Valeškevič, I. N. *The Fourier method for differential equations containing a second derivative with respect to time* 1463

Brjuno, A. D. *The asymptotic behavior of solutions of nonlinear systems of differential equations* 464

Brodskiĭ, M. S. *Unicellularity of real Volterra operators* 1749
Bronštein, I. U. *On dynamical systems without uniqueness, as semigroups of non-singlevalued mappings of a topological space* 824
Budak, B. M. *Homogeneous differential-difference schemes of second order accuracy for parabolic and hyperbolic equations with discontinuous coefficients* 198
Burago, Ju. D.; Maz'ja, V. G. and Sapožnikov, V. D. *Double layer potential for nonregular regions* 1640
Byhovskiĭ, È. B. *Nonadmissible viscosity matrices for the equations of isothermal gas motion* 1372
Čakmazjan, A. V. *Evolute surfaces of a two-dimensional dually normalized surface D_2 in euclidean space E_4* 897
Čarin, V. S. *On bicompact groups with maximality condition for subgroups* 1159
Cekanovskiĭ, È. R. *On model elements of non-selfadjoint operators* 256
Čencov, N. N. *Evaluation of an unknown distribution density from observations* 1559
Čeremnyh, Ju. N. *The behavior of the solution of the first boundary value problem with zero conditions at the boundary for a general parabolic equation* 448
Černavskiĭ, A. V. *The impossibility of a strictly continuous two-to-one partition of a homology cube* 726
Černikov, S. N. *Algorithms for finding nodal solutions of a system of linear inequalities* 935
Conditions for local finiteness of single-layered p-groups 1563
Čistjakov, V. P. and Markova, N. P. *On some theorems for inhomogeneous branching processes* 1619
Čudov, L. A. *Difference methods of solving the Cauchy problem for the Laplace equation* 599
Čunihin, S. A. *Complexions of nonspecial subgroups of finite groups* 1515
Decomposition of Π*-solvable groups into a direct product of subgroups* 1784
Daleckiĭ, Ju. L. *An asymptotic method for certain differential equations with oscillating coefficients* 520
Daniljuk, I. I. *Generalized Cauchy formula for axially symmetric vector fields* 1290
An investigation of three-dimensional boundary value problems with axial symmetry 1336
Davidenko, D. F. *On the construction of difference equations for the approximate solution of the equation of Euler-Poisson-Darboux* 77
DeMarr, Ralph *Transformations in semigroups and many-valued mappings* 839
Demuškin, S. P. *The imbedding problem for algebraic number fields* 643
Didenko, V. P. *Some elliptic systems which degenerate at the boundary of a given region* 566
Certain systems of differential equations of mixed type 796
Dinculeanu, N. *Integral representations of linear operators in Orlicz spaces* 1471
D'jakonov, E. G. *The method of nets for solving parabolic equations of order 2m with separable variables* 276
A method for solving Poisson's equation 320
Difference schemes with a splitting operator for nonstationary equations 645
Dočev, Kiril *On a theorem of S. N. Bernštein* 1222
Dolženko, E. P. *Approximation on closed regions and zero-sets* 472
Dragilev, M. M. *On the existence of a common basis for imbedded spaces of analytic functions* 973
Drožžinov, Ju. N. *On the stability of solutions of the Cauchy problem for a parabolic equation* 8
Dynkin, E. B. *Brownian motion with killing measure μ and velocity measure ν* 749

Džafarov, A. S. *On the theory of best approximation of functions of several variables by entire functions of finite degree* 46
Theorems of weighted imbedding 82
Džanaš:ja, G. A. *Carleman's problem for functions of the Gevrey class* 969
Džavadov, M. G. *Asymptotic solution of the mixed problem for a fourth order equation with small parameter degenerating into a second order hyperbolic equation* 696
Džrbašjan, M. M. *Expansions in systems of rational functions with fixed poles* 315
Orthogonal systems of rational functions on a circle with a given set of poles 1794
Džuraev, A. *A general linear boundary value problem for the equation* $\Delta u + \lambda c(x, y)u = 0$ 206
The Poincaré problem for a second-order elliptic equation with singular coefficients 1415
Efimov, N. V. *Impossibility of isometric immersion into three-dimensional Euclidean space of certain manifolds with negative Gaussian curvature* 1293
Egorov, I. P. *Maximally mobile Einstein spaces of nonconstant curvature* 1124
Egorov, Ju. V. *Certain problems in the theory of optimal control* 1080
Èidel'man, S. D. *On boundary-value problems for parabolic systems in a half space* 191
El'šin, M. I. *A solution to a classical problem of oscillations* 1752
Emeličev, V. A. *Solution of some algorithmic problems for commutative semigroups* 699
Eremin, I. I. *Iteration method for Čebyšev approximations for sets of incompatible linear inequalities* 570
Eršov, A. P. *Reduction of the problem of memory allocation in programming to the problem of coloring the vertices of graphs* 163
Eršov, A. P. and Kožuhin, G. I. *Estimates of the chromatic number of connected graphs* 50
Evtušik, L. E. *On a method of constructing the invariant forms and structural equations of infinite groups* 1224
Faĭnšmidt, V. I. *Certain regularly monotonic polynomials of least departure from zero* 998
Fedorov, F. I. *Combination of Lorentz group parameters* 357
Fišman, K. M. and Sas'ko, G. M. *On certain systems of functions which form quasi-power bases in spaces of functions analytic in a disk* 1311
Fogels, È. K. *Distribution of analogues of primes* 1315
Foht, A. S. *Estimate of the size near the boundary of the solutions of elliptic equations of any order with constant coefficients* 1255
Evaluation near the boundary of its domain of a polyharmonic function and its derivatives defined on a circle 1555
Some estimates near the boundary of the region of a polyharmonic function and its derivatives given on an N-dimensional domain 1730
Fomenko, O. M. *On Dirichlet's L-functions* 120
Fomenko, V. T. *Isometries of surfaces of positive curvature under certain boundary conditions* 67
An investigation of solutions of the fundamental equations of the theory of surfaces 686
On bending and uniqueness of surfaces of positive curvature with an edge 723
Freĭdlin, M. I. *A mixed boundary value problem for elliptic differential equations of second order with a small parameter* 616
The Dirichlet problem for an equation involving a small parameter and with discontinuous coefficients 767
Fridman, A. A. *Degrees of insolvability of the word problem in finitely defined groups* 1733
Fuks, D. B. and Švarc, A. S. *On the homotopy theory of functors in the category of topological spaces* 444

Fuksman, A. L. *Local properties of certain approximation operators* 122
Funtakov, V. N. *Expansion in eigenfunctions of non-selfadjoint singular second order differential equations* 771
Gabasov, R. *Optimal processes with cyclic constraints* 787
Gameckiĭ, A. F. *On the theory of covering an n-dimensional Euclidean space with equal spheres* 1410
Gamkrelidze, R. V. *Optimal sliding states* 559
Gaposkin, V. F. *The localization principle and systems* $\{\phi(nx)\}$ 633
The critical-point principle in Banach spaces 1076
Gauhman, V. A. *Affine connections on manifolds with almost complex structure* 156
Symmetric almost symplectic affine connections on Hermitian manifolds 1274
Gel′fand, I. M. and Graev, M. I. *Categories of group representations and the problem of classifying irreducible representations* 1378
Construction of irreducible representations of simple algebraic groups over a finite field 1646
Gel′fand, I. M. and Pjateckiĭ-Šapiro, I. I. *Unitary representations in homogeneous spaces with discrete stationary groups* 1528
Unitary representations in a space G/Γ, *where* G *is a group of n-by-n real matrices and* Γ *is a subgroup of integer matrices* 1574
Gel′fer, S. A. *Extension of the Goluzin-Schiffer variational method to multiply connected regions* 70
Gelig, A. H. *Stability of motion of systems with more than one equilibrium position* 1643
Gel′man, A. E. *On analytic solutions of essentially nonlinear equations* 635
Geronimus, Ja. L. *On Steklov's conjecture* 74
On the connection between the order of growth of orthonormal polynomials and the character of the distribution 1278
Gerver, M. L. and Landis, E. M. *A generalization of the mean value theorem for functions of several variables* 1382
Gil′derman, Ju. I. *Fourier transforms for abstract set functions* 791
Abstract set functions and Sobolev's imbedding theorems 832
Gimadislamov, M. G. *Eigenfunction expansions for non-selfadjoint operators of even order in the space of vector-valued functions* 311
Expansion in eigenfunctions of a non-selfadjoint system of differential equations on the whole axis 1331
Gindikin, S. G. *Analytic functions in tubular regions* 1178
Gindikin, S. G. and Karpelevič, F. I. *Plancherel measure for Riemann symmetric spaces of nonpositive curvature* 962
Glazman, I. M. and Skaček, B. Ja. *On the discrete part of the spectrum of the Laplacian in limit-cylindrical regions* 1689
Globenko, I. G. *Convergence of variational processes* 1649
Gluško, V. P. *On regions which are star-like with respect to a sphere* 878
Godunov, S. K. *Nonuniqueness of solutions of parabolic systems* 1020
Gohberg, I. C. *Tests for one-sided invertibility of elements in normed rings, and their applications* 1119
A general theorem concerning the factorization of matrix-functions in normed rings, and its applications 1281
Gohberg, I. C. and Kreĭn, M. G. *On factorization of operators in Hilbert space* 1578

Gol′dberg, V. V. *Conjugate nets with a T_1 pair as congruence axes* 1024
Golod, E. S. *On the homology of some local rings* 745
Golovin, O. N. *Polyidentical relations in groups* 1115
Golovin, V. D. *On a Riesz basis of exponential functions* 920
Golovkin, K. K. and Solonnikov, V. A. *Imbedding theorems for fractional spaces* 468
Gol′štejn, E. G. *On a general formulation of the problem of best approximation* 637
Gončar, A. A. *On series of rational functions* 562
Gorčakov, Ju. M. *Primitively π-factorizable groups* 1219
Locally normal groups 1654
Gorgula, V. I. *On the duality principle of A. I. Markuševič* 375
Gorin, E. A. *A property of the ring of all continuous functions on a bicompactum* 159
Govorov, V. E. *Rings over which flat modules are free* 836
Grigor′eva, I. A. *A generalization of Bernštejn's theorem on the form of non-negative trigonometric polynomials to the case of an arbitrary number of relations between the coefficients* 1583
Gromov, V. P. *Series of $\{f(\lambda_n z)\}$ functions* 639
Gromyko, V. P. *Some criteria for generalized solubility and speciality of πd-groups* 271
Groza, L. A. *Asymptotic behavior of solutions of a second-order linear differential equation in Banach space as a small parameter with the first and second derivatives approaches zero* 267
Grušin, V. V. *A problem for the entire space for a certain class of partial differential equations* 1467
Gudiev, A. H. *An imbedding theorem for restrictions as abstract functions* 1693
Gudkov, D. A. *Bifurcation of simple double points and cusps of real plane algebraic curves* .. 202
Variability of simple double points on real plane algebraic curves 273
Gurariĭ, V. I. *Inclinations of subspaces and conditional bases in Banach space* 1028
Gurariĭ, V. I. and Kadec, M. I. *Minimal systems and quasicomplements in Banach space* 966
Guseĭnov, A. I. and Muhtarov, H. Š. *Theorem establishing the existence of a bounded solution for nonlinear singular integral equations with a Cauchy kernel* 1285
Gusman, S. Ja. *Uniform approximation of generalized analytic functions* 794
Hačatrjan, I. O. *Weighted approximation of entire functions of zero degree by polynomials on the real axis* 1106
Halfin, L. A. *A statistical approach to approximate calculation methods. Effective quadrature formulae* 893
Harasahal, V. H. *Structure of solutions and regularity of linear systems of differential equations with quasiperiodic coefficients* 1506
Hasin, G. B. *Successive Laplace transformations with fibered congruences of the axes* 1210
Has′minskiĭ, R. Z. *On certain differential equations encountered in the investigation of oscillations with small random perturbations* 125
An estimate of the solution of a parabolic equation, and some of its applications 555
Hodžaev, L. Š. *The operator of analytic prolongation of generalized functions* 1813
Hromov, A. P. *Eigenfunction expansion of ordinary linear differential operators in a finite interval* 1510
Ibragimov, I. A. *Stationary Gaussian sequences that satisfy the strong mixing condition* 1799
Il′in, A. M. *On the fundamental solution for a parabolic equation* 1697
Il′in, A. M. and Has′minskiĭ, R. Z. *An ergodic property of nonhomogeneous diffusion processes* 1136

Il'in, V. A. *The Fourier method for a hyperbolic equation with discontinuous coefficients* 12
Ismagilov, R. S. *Conditions for self-adjointness of differential operators of higher order* 279
Ivanov, V. K. *Integral equations of the first kind and an approximate solution for the inverse problem of potential* 210
On linear problems which are not well-posed 981
Ivanov, V. V. *A general approximation method for solving linear problems* 415
Algorithms of rapid descent 476
Ivašev-Musatov, O. S. *M-sets and Hausdorff measure* 213
Jakubovič, V. A. *The solution of certain matrix inequalities in automatic control theory* 620
Janov, Ju. I. *Identical transformations of regular expressions* 1630
Kac, G. I. *Representations of compact ring groups* 1139
Finite ring groups 1532
Kac, I. S. *On the multiplicity of the spectrum of a second-order differential operator* 1035
Kagan, A. M. *An empirical Bayes approach to the estimation problem* 1760
Kalafati, P. D. *Oscillatory properties of fundamental functions in third-order boundary value problems* 418
Kamynin, L. I. *A problem of hydraulic engineering* 480
The method of potentials for a parabolic equation with discontinuous coefficients 1189
Kapilevič, M. B. *Singular Cauchy problems for Čaplygin's equation* 1341
Karpelevič, F. I. *Orispheric radial parts of Laplace operators on symmetric spaces* 528
Kazačkov, B. V. *On the finite* Π*-conjugacy of groups* 842
Keldyš, Ljudmila *Imbedding of zero dimensional compacts in* E^n 1701
Kiguradze, I. T. *Oscillation properties of solutions of certain ordinary differential equations* .. 649
Kiprijanov, I. A. *A class of imbedding theorems with a weight* 1657
Kirillov, A. A. *Infinite-dimensional representations of the total matrix group* 652
Kiselev, A. A. and Slavutskiĭ, I. Š. *Certain congruences for the number of representations by sums of an odd number of squares* 378
Kolesov, Ju. S. and Krasnosel'skiĭ, M. A. *Ljapunov stability and equations with concave operators* 1192
Kolmogorov, A. N.; Miščenko, E. F. and Pontrjagin, L. S. *A probability problem of optimal control* 1143
Kondrašov, V. I. *On the theory of boundary-value problems with conditions at the boundary containing parameters* 284
On the theory of boundary value problems in regions with a degenerate contour for variational and partial differential equations 584
Kondrat'ev, V. A. *Estimates of derivatives of solutions to elliptic equations near the boundary* 1226
Konovalov, A. N. *The fractional step method for solving the Cauchy problem for an n-dimensional oscillation equation* 1536
Korneĭčuk, N. P. *The existence of a linear polynomial operator affording the best approximation on a class of functions* 324
The exact constant in D. Jackson's theorem on best uniform approximation of continuous periodic functions 1040
Korobeĭnik, Ju. F. *Analytic solutions of Tricomi's equation* 86
Korobkov, V. K. and Reznik, T. L. *Certain algorithms for the computation of monotonic functions in the algebra of logic* 1763
Koroljuk, V. S. *On the asymptotics of distributions of maximum deviations* 90

Korotkov, V. B. *On direct and inverse imbedding theorems for some spaces of abstract set functions* 804
Abstract set functions and embedding theorems 1345
Košelev, A. I. *Convergence of the method of successive approximations for quasilinear elliptic equations* 219
Kostovskiĭ, A. N. *The determination of strict inequalities between the moduli of roots in the transformation of algebraic equations by the Lobačevskiĭ-Graeffe method* 1587
Kozmidiadi, V. A. *Sets enumerable and solvable by automata* 216
Kraplin, M. A. *Integral and meromorphic solutions for a certain class of difference equations* 223
Krasnosel′skiĭ, M. A. and Pustyl′nik, E. I. *Tests for complete continuity of linear and nonlinear integral operators* 16
Krasnosel′skiĭ, M. A. and Sobolevskiĭ, P. E. *The structure of the set of solutions of equations of parabolic type* 1230
Kreĭn, M. G. *Perturbation determinants and a formula for the traces of unitary and self-adjoint operators* 707
Kreĭn, S. G. and Laptev, G. I. *Boundary value problems for an equation in Hilbert space* 1350
Kresnjakova, L. V. *Regular functions with bounded mean modulus* 1590
Krivov, V. V. *Extremal quasiconformal mappings in space* 1042
Kručkovič, G. I. *On the uniqueness of a minimal semireducible decomposition* 1419
Kudaev, M. B. *The use of Ljapunov functions for investigating the behavior of trajectories of systems of differential equations* 1802
Kuks, L. M. *Sturm's theorem and oscillation of solutions of strongly elliptic systems* 24
Kulikova, M. F. *A construction problem concerned with the distribution of the fractional parts of an exponential function* 422
The construction of a number α for which the fractional parts of $\{\alpha g^x\}$ are distributed with rapid uniformity 483
Kušnirčuk, I. F. *A partial differential equation of higher order* 1087
Kuz′mina, G. V. *Some covering theorems for univalent functions* 21
Kuznecov, N. V. *A generalization of a theorem stated by V. A. Ambarcumjan* 1475
Ladyženskaja, O. A. and Ural′ceva, N. N. *The first boundary value problem for quasilinear second-order parabolic equations of general form* 1539
Laĭ Dyk Thin′ *On the number of divisors within an angle* 327
Landkof, N. S. *Fourier transforms of certain classes of generalized functions* 1662
On the general theory of linear filters 1705
Langenbah, A. *On an application of the method of least squares to nonlinear equations* 330
Latyšev, V. N. *On algebras with identity relations* 1423
Lebedev, L. P. *An efficient method of constructing best approximation procedures* 97
Lebedev, V. I. *On four-point schemas of increased accuracy* 94
Leĭbenzon, Z. L. *The uniqueness of the solution of the inverse problem for ordinary differential operators of order $n \geq 2$, and the transformation of such operators* 100
A connection between the inverse problem and the completeness of eigenfunctions 1045
Leonov, N. N. *A discontinuous point transformation of a straight line into a straight line* 532
Leontovič, An. M. *On the stability of the Lagrange periodic solutions for the reduced problem of three bodies* 425
The existence of unbounded oscillating trajectories in a problem of billiards 1049
Levin, A. Ju. *On the question of the zeroth stability zone* 1196

Levin, V. L. *On a class of locally convex spaces* 929
Conditions for B-completeness of ultrabarrelled and barrelled spaces 984
Levitan, B. M. *Continuation of solutions of partial differential equations* 1234
Lin, V. Ja. *Equivalent norms in the space of Fourier transforms of functions with bounded support* 656
Linnik, Ju. V. *Statistically similar zones of linear type* 844
On the theory of statistically similar regions 1297
Linnik, Ju. V. and Skubenko, B. F. *The asymptotic behavior of third-order integral matrices* 1428
Litvinčuk, G. S. and Hasabov, È. G. *Hilbert's boundary value problem with shift* 54
A class of singular integral equations with translation 1092
Litvinkov, S. S. *Differentiability of Fourier series with respect to generalized spherical harmonics* 847
Lizorkin, P. I. *Imbedding theorems for functions from the L_p^r spaces* 536
$L_p^r(\Omega)$ spaces. Extension and imbedding theorems 1053
Ljance, V. È. *A generalized notion of spectral operator* 59
Malahovskiĭ, V. S. *Congruences of parabolas in equiaffine geometry* 1354
On a class of congruences of second-order curves with degenerate focal surface 1386
Mal'cev, A. I. *Strongly related models and recursively complete algebras* 987
On recursive abelian groups 1431
Mamedov, R. G. *Direct and converse theorems in the theory of approximation of functions by m-singular integrals* 711
On the asymptotic value of the approximation of repeatedly differentiable functions by positive linear operators 1435
The order and the asymptotic behavior of approximations to nondifferentiable functions by certain types of positive linear operators 1598
Manevič, V. A. *Generalized problem of Cayley and some questions connected with it* 589
Manin, Ju. I. *Two-dimensional formal abelian groups* 335
On the classification of formal abelian groups 757
Commutative formal groups and abelian manifolds 992
Marčenko, N. V. *On the continuation of an operator and the existence of fixed points* 1767
Mardešić, S. and Papić, P. *Dyadic bicompacta and continuous mappings of ordered bicompacta* 430
Markov, A. A. *Computable invariants* 1440
Markus, A. S. *Expansion in root vectors of a slightly perturbed self-adjoint operator* 104
Eigenvalues and singular values of the sum and product of linear operators 1238
Martynjuk, A. E. *Solution of a fundamental boundary value problem for certain linear partial differential equations of even order* 1805
Maslennikova, V. N. *A class of systems of quasilinear diffusion equations* 1300
Maslov, S. Ju. *Transformation of arbitrary canonical calculi into canonical calculi of special types* 1708
Máté, L. *On a semigroup of operators in Fréchet space* 288
Matjuškov, V. V. *The vertex function of directed graphs* 1241
Matulis, V. A. *Two versions of classical computation of predicates without structural rules of deduction* 1770
